**Abstract**

Vietnam is facing the problem of how to accept language diversity, hybrid language in the context of cyberspace, but still preserve, preserve and promote the purity of Vietnamese is Vietnamese culture.

Contemporary poetic language from the effects of cyberspace, is a highly experimental language, tends to cancel words, save words and accept all words. Therefore, non-standard languages, languages not in dictionaries, are not normally used with more density, and it is gradually establishing an equal voice with standardized according to the concept of society. Hybrid English, creative new words, slang ... are just some common cases of cyber-impact on languages, what is the solution for it?
